

AQUAGUSTO

A PRACTICAL FILTER SOLUTION FOR COFFEE AND ESPRESSO MACHINES WITH WATER TANK

Whether in HoReCa or in the office, the BRITA AquaGusto water tank filter will enhance the flavour, aroma and appearance of coffee. And, of course, that also applies to espresso and cappuccino. The filter can be used in almost any coffee machine and reduces limescale deposits. It is impressively simple and quick to operate, and users also benefit from the added filter exchange signal.

Forgetting to change the filter is now a thing of the past. The filter change signal means you always know the right time to change the filter. Simply place the filter in a visible location and press the button firmly.

THE BENEFITS TO YOU

- Can be used in all conventional water tanks: no adapter, no assembly
- Easy to use: simply place in the tank and allow to stand
- Including automatic filter change signal – for better service
- Simple and immediate filter installation and exchange by the user
- Enhanced coffee flavour, aroma and appearance
- Reduces limescale deposits

VERSATILE OPERATION

AquaGusto filters are suitable for use in all coffee machines with a water tank.

The food safety of BRITA Professional water filter products is tested and monitored by independent institutes.

Using the filter exchange display

Stick the filter exchange display to the water tank and press the start button firmly.

When a red line is visible, the filter exchange display is activated.

The red zone extends over time until the maximum period of use has been reached.

After approx. six months, the maximum period of use has been reached and the filter must be exchanged.

AquaGusto	100	250
Dimensions (width/depth)	85.1/25.8 mm	115.5/32.9 mm
Capacity*/Period of use*	100 l/max. 6 months	250 l/max. 6 months
Water input temperature	4 – 30°C
