

POLYMER BEAN JARS

PRODUCT DESCRIPTION:

The **POLYMER BEAN JAR** is a super food safe, robust, and versatile addition to your **COMANDANTE® C40** grinder — **100% compatible** with all **COMANDANTE® C40 MK3** and **MK4** models. Available in classic tones and various colours, choose your style!

Lightweight and basically unbreakable, the **POLYMER BEAN JAR** is the perfect travel solution.

Use it to safely transport your beans, to hold your ground coffee, or even to drink your freshly brewed coffee from — its thick walls insulate the heat, keeping your coffee warmer for longer and your fingers safe.

The new design offers some great workflow advantages too. All **POLYMER BEAN JARS** are totally uniform in weight — ideal for pre-weighing multiple doses of coffee at home, at work, or at competitions. What's more, this high-performance polymer makes it easier to remove unwanted chaff from your ground coffee with the aid of static charge, improving cup quality. Finally, the super smooth and vertical sidewalls help with minimal retention of coffee grounds — less waste and faster when dosing into your brewer or portafilter.

COMANDANTE® uses only BPA-free high-performance polymers that meet the strictest food-safety standards. Safe and gentle for you and your precious coffee beans, but engineered to be tough and robust and endure years of heavy use. Made in Germany.
